

SpeechLive

The *anywhere* dictation system.

The first dictation system with built-in speech recognition.

Philips SpeechLive allows you to record dictations on the go and seamlessly create text files. Your dictations are automatically encrypted and securely sent to SpeechLive to be converted into a document. Dictation files can be transcribed by an assistant directly within SpeechLive or you can choose the professional Philips certified transcription service or the SpeechLive speech recognition service.

The choice is yours:

Dictation system

Dictation recorder app

Speech recognition

Transcription service

01 Speak
